- Caller ID on call waiting
- Operators services phonebook

Memory Capacity
- Name & number shared phonebook: 65
- Melody download capacity: -
- SMS storage capacity: 25
- Call log entries: 40

Product highlights

Full graphic display
This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

Backlight on screen
Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting include LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green color, while EL panels are smooth with blue, white or green shades.

Text messaging (SMS)
The Short Message Service (SMS) is a mechanism for delivery of short messages which can have up to 160 characters of text. These 160 characters are plain text in nature and can be comprised of words, numbers or an alphanumeric combination. The Eatoni®LetterWise predictive text editor helps you to write text messages more quickly. With its unique SMS system you can receive up to 200 messages in 10 different mailboxes. Greeting to a loved one, a quick reminder about an important meeting, …all this can now be put in a SMS and sent over the fixed network.

Eatoni text editor
Eatoni's LetterWise is an easy-to-use text-entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Personal mail boxes
Children at a certain age need some privacy at home when sending SMS to their friends. But paying for several mobile phones quickly gets very expensive. DECT phones provide up to 9 personal SMS mail boxes which can be protected by a PIN code - SMS can stay private despite collective phone usage. The user must tell his correspondents his mail box number so that they can send short messages directly to this personal mail box. Sending a SMS from a personal mailbox makes it easy for the addressee to reply directly to this mailbox without having to remember the mailbox number.

Alarm clock

Keypad lock
How convenient it is to take your DECT phone with you whilst gardening. But in your pocket it can be so jolted that a key might be accidently pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill!

Pilot key & carousel menu
The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.

Do-not-disturb function
Tired of your children's friends calling just when you're about to serve dinner? The "Do-not-Disturb" function lets you screen unwanted calls and mute the ringer when you do not wish to be disturbed, but keeps the line open to the family.
